

# Mary chooses Leander!

## The new royal twins are sleeping in Leander Beds.

Mary & Frederik contacted Leanderform late last year and upon receiving colour swatches, they placed an order for two beds with all accessories. The beds were delivered in time for the birth and are now set up in the royal nursery.

The news came from Denmark last night and is of great excitement for the Leander brand here in Australia. Distributor Gillian Rose from Danish by Design says: "It is very fitting that the Crown Prince & Crown Princess chose Leander as it is a Danish brand. We have always known that the beautiful design was fit for a princess, and now it is reality with both a prince and a princess sleeping side by side in Leander Beds."

The Leander Bed is well known in Australia for its attractive design and highest quality European materials. It offers 4 different configurations from cot to junior bed following the development from baby, to toddler, to school age child.

The Leander range also includes the very stylish Leander Cradle, the versatile Leander Chair and soon to arrive in Australia the stunning Leander Change Table.
